

ACCEPT CRYPTO

OUR RESEARCH

Adoption of cryptocurrency in businesses is inevitable.

Businesses around the world are curious about accepting cryptocurrency as a method of payment and the majority of them do not have the know-how or resources to get started.

OUR MISSION

Accept Crypto (\$ACEPT) is a first-of-its-kind cryptocurrency with a unique use case to get cryptocurrencies accepted by large and small companies across the globe.

With funding provided through multiple avenues (including a percentage of taxes), Accept Crypto is forming outreach teams of industry insiders that are going to change the game in a big way. We will execute a strategy for cryptocurrency acceptance and implementation in businesses.

THE BIG IDEA

Teams are being put in place to do the following:

1. Research companies that have the potential to accept cryptocurrency and reach out to them.
2. Explain the benefits of not only accepting cryptos, but actually holding them and using them for things such as paying employees who opt to receive a portion of their paycheck in crypto.
3. Offer long-term customer support to companies who choose to pursue accepting cryptocurrencies.
4. Create easy-to-understand presentations on each of the potential ways to accept cryptocurrencies. Those will be used in the pitches to help determine what form of acceptance is best for each company.

THE BIG IDEA (cont...)

5. Walk companies through setup and implementation, to ensure accepting cryptocurrency is as easy, beneficial, and seamless as possible.
6. The influencers on the project, including Matt Wallace, Myles G Investments, and many others, will use their platforms to inform and educate about Accept Crypto. They will also give companies free publicity when they accept cryptocurrencies. Will also use verified accounts of team members to establish credibility.
7. Accept Crypto will continue to get a lot of publicity every time we get a company to accept cryptocurrency and it goes viral in our community. That will lead to a lot of new people joining this movement and cryptos also. A win-win!

TOKENOMICS

Our developers, Solidity Finance, have created a token with well-tested tokenomics, coding, and development. This will serve as the backbone of how investors will benefit beyond technical analysis.

The use case will not only take our community to the next level but also help grow the crypto community. Here at \$ACEPT, we have the perfect trifecta to facilitate our exponential growth, technology use case, and major incentivizing catalysts.

DISTRIBUTION

1,000,000,000,000 Token Supply

\$ACEPT TAXATION

Buy Taxes Distribution

Maximum Fees 10%

Buyback and Burn 2%

Liquidity Pool 2%

Marketing 3%

Development 3%

Sell Taxes Distribution

Maximum Fees 10%

Buyback and Burn 2%

Liquidity Pool 2%

Marketing 3%

Development 3%

BUYBACK and BURN

\$ACEPT is a hyper-deflationary token.

Our buyback-and-burn will support \$ACEPT's long-term price stability and value growth. With each buyback-and-burn, the net asset value will be divided among a shrinking supply of tokens in circulation. As a result, the price of the \$ACEPT token should continuously grow over time.

PHASES

Phase 1

Fair Token Launch
First Token Burn
CoinMarket Cap Listing
CoinGecko Listing
